

Gateway HW-BA5221-W2

HW-BA5221 Gateway is applied to connect equipments with RS-232/485 interface protocol to the LONTALK System, and implement the communication between RS-232/485 equipments and LON equipments and host Computer Manage System.

Features

- Communication Mode (RS-232 or RS-485) can be selected through jumpers
- Adopt insulated power supply
- Support for special customized equipment interface protocol
- Reading all running parameters of thermostat in real time and sending them to computer management system.
- Receiving commands from the computer management system to setup the thermostats
- Can connect up to 56 Thermostat

Technical Specification

Operating Voltage: 24VDC

Operating Current: < 25mA

Operation Environment: -20°C ~ 60°C, 10% ~ 95% RH, non-condensing

Network Protocol: LONTALK, RS-232/485 Bus

Communication Ports: 2 LON port and 1 RS485 port

Ordering Information

Part No	Description
HW-BA5221-W2	Gateway. For protocol conversion between RS-232/422/485 and Lon Talk. Connect the Networkable thermostat to Lon Trunk.
