

Router Module HW-BA5260

HW-BA5260 Router is a router to connect two Lon Works network (generally between the trunks and branch), which is mainly used to optimize network performance and improve network communication quality.

Features

- Connecting two TP/FT-10 LonWorks channels.
- Optimize Network performance and improve Network communication quality.
- Extends the limits of a single channel, support additional nodes (more than 62 nodes).
- Extends the maximum channel length (for bus topology, longer than 2700m, and for free topology, 500m).
- Easy in installation and maintenance.

Technical Specification

Operating Voltage: 24VDC

Operating Current: < 20mA

Operation Environment: -20°C ~ 60°C, 10% ~ 95% RH, non-condensing

Network Protocol: LONTALK

Ordering Information

Part No	Description
HW-BA5221-W2	Gateway. For protocol conversion between RS-232/422/485 and Lon Talk. Connect the Networkable thermostat to Lon Trunk.
