

Gateway

HW-BA5221-W2

Description

HW-BA5221 Gateway is applied to connect equipments with RS-232/485 interface protocol to the LONTALK System, and implement the communication between RS-232/485 equipments and LON equipments and host Computer Manage System.

Technical Specifications

- Operating Voltage: 24VDC
- Operating Current: < 25mA
- Operation Environment: -20°C ~ 60°C, 10% ~ 95% RH, non-condensing
- Network Protocol: LONTALK, RS-232/485 Bus
- Communication Ports: 2 LON port and 1 RS485 port

Features and Benefits

- Communication Mode (RS-232 or RS-485) can be selected through jumpers
- Adopt insulated power supply
- Support for special customized equipment interface protocol
- Reading all running parameters of thermostat in real time and sending them to
- computer management system.
- Receiving commands from the computer management system to setup the thermostats
- Can connect up to 56 Thermostat

Ordering Information

Part Number: HW-BA5221-W2

Description: Gateway. For protocol conversion between RS-232/422/485 and Lon Talk.

Connect the Networkable thermostat to Lon Trunk.

Pack Qty. per Box: 1
